

Chemical Waste Requirements

- Dispose of all chemical waste through Environmental Health & Safety.
- Do not overfill containers. Leave head space.
- Keep waste stored at or near the point of generation under your control. Do not move it to other rooms.
- Obtain training or waste management guidelines at HPO's web site.

Label containers with the contents and use pencil (no abbreviations or formulas) to complete labels provided by EHS.

Keep containers closed except when adding waste.

Use secondary containment.

Use separate containers for different waste streams to avoid unwanted reactions.
